

Business email done right!

Domain based corporate and business email is a great complement to complete a hosting package or domain name registration. You can finally take control of your Inbox and own your email addresses. In a competitive market having your own domain hosted email can set you apart from the competition. Getting started is simple and at a very low cost at only \$10 per month. We think it is quite a bargain!

Features

Bright Idea

If you changed Internet Providers today what would happen to your email addresses? Think about it?

For only \$10/mo you can own your own email addresses that follow you regardless of who provides your Internet service.

Total control for your business, we like it! ... and you will too

- SPAM and Virus Filtering
- Barracuda or CLAM Anti-Virus filtering available
- Integrated Webmail
- Self-Managed Domain and Per-User Configurations
- Online Account Management
- Per User Whitelist and Blacklist options
- Aliases, Group Mailboxes and Round-Robin also available

Benefits

With each email you send you inform others of your company name and website while at the same time showing off a professional image. There is no better cost-effective way to create a positive impact on the image of your business.

Accessibility

With Dytex as your email provider you have the ability to check your email anywhere. We provided multiple way to access your email. You can access email using an email application, access webmail using any web browser, or even access email on the go by using your mobile

device. Access you email anytime, anywhere. It's as simple as that. [Read More...](#)

Options

With each Hosted Email Domain we offer optional services for clients who need a little more. Upgraded storage space, increased quotas, Exchange Features, IMAP, PDA Synchronization and other options are available.
